EDUCATION

ASCM CSCP Certificate - In Progress

Expected Exam - Sept 2026

Cal Poly Humboldt

Bachelors Degree Economics, Concentration Data Science

SUMMARY OF QUALIFICATIONS

Supply Chain & Analytics Professional with hands-on experience driving data-driven optimization across aerospace manufacturing and procurement workflows. Proficient in leveraging **Python, SQL, and Tableau** to build predictive demand models, automate reporting pipelines, and mitigate supplier risk. Proven track record of delivering measurable operational wins, including cutting data processing time by **58%** at Ix.. **ASCM CSCP Candidate (Sept 2026)** with a strong background in economic and market intelligence.

SKILLS

Forecasting & Analytics: Demand Forecasting, Inventory Analytics, Logistics Network Analysis, Supply Chain Modeling, Operations Analytics, Cost-Benefit Analysis, KPI Reporting, Process Automation.

Technical: SQL(Intermediate/Advanced), Python (GeoPandas, NetworkX, FastAPI, Pandas), Tableau, Advanced Excel (VLOOKUP, Pivot Tables), Snowflake, ArcGIS, Neo4j, MapBox, OpenAi API, Claude Code, AI Integration.

WORK & LEADERSHIP EXPERIENCE

Supply Chain Data Analyst (Customer Support Rep)

Aug 2026 - Present

LMI Aerospace | Seattle, WA

- Automated a routine reporting task using **Python** and **SQL** connected with an **ERP** system to reduce reporting time by roughly 70 percent.
- Utilized an **ERP** system to manage end-to-end delivery schedules and logistics tracking for aerospace components, coordinating across manufacturing teams to prevent **supply chain bottlenecks**.
- Analyzed shipping lead times, vendor performance, and production backlogs to forecast delivery risks and brief stakeholders.

Supply Chain & Procurement Analyst

May 2025 - Aug 2026

mLab Supply | San Diego / Remote

- Analyzed supplier markets, pricing trends, and supply chain data to support procurement planning and sourcing decisions.
- Built automated reporting workflows and dashboards using **Python, SQL, and Excel**, reducing processing time by **10 hours** a week.
- Applied forecasting and market intelligence to identify supply risks and emerging procurement opportunities reducing stockout by **63%** from role start.
- Utilized **ERP system** to manage supply chain operations and optimize process efficiency by **35%** from beginning the role.

Data Analyst

Jan 2026 – April 2026

Ix (Early Stage Startup) | San Diego, CA

- Applied economic and market analysis to evaluate competitive dynamics, technology adoption, and industry trends, producing intelligence to support strategic decision-making.
- Built data infrastructure that led to a reduction in data processing time by **58%**.
- Built operational dashboards and automated reporting processes that improved business visibility.
- Conducted quantitative analysis using **SQL, Python, and Excel** to identify trends and support leadership decisions.
- Collaborated across technical and business teams to improve operational workflows and reporting efficiency.

Research Analyst Intern

Jan 2025 - May 2025

IRAR CPH | Arcata, CA

- Cleaned, structured, and queried over **140,000+ rows** of multi-year institutional student data via **SQL** and **Python** to map longitudinal tutoring engagement against academic outcomes.
- Engineered** predictive data models in **Python** (utilizing Pandas and Scikit-learn/NumPy) to analyze historical academic records, identifying prerequisite course failure chains and predicting which classes students struggle in based on prior performance.
- Translated complex behavioral and academic datasets into clear executive summaries, directly influencing targeted intervention strategies that improved student retention tracking metrics by **12%**.
